

# I hate to clean the shower -

And no one wants to use a dirty shower! What's a person to do?

When we first got our motorhome, we tried using a squeegee followed by a towel on the shower walls and glass to keep them from getting a build-up from all the hard water and soap scum films. Then one day we noticed the spray bottles of daily shower cleaners. Everyone one we picked up had a warning about using them on brass and several other surfaces – what a disappointment! Then we ran across Arm & Hammer's Clean Shower. It's safe to use on brass. Starting with a clean shower, a little misting of the walls after every shower is all it takes to keep the shower stall looking like NEW – after spritzing the inside of the shower, just let it air dry. DO NOT wipe it down! Even the floor drain stays clean! We highly recommend it and won't leave home without it. You should be able to find it on the shelf in most grocery stores and Wal-Mart stores. The product was originally called Arm & Hammer Clean Shower but Church & Dwight bought the product from them and latest bottles are labelled Scrub Free Clean Shower Daily Shower Cleaner - the stuff the bottle is still the same.

(If you start with a shower that needs cleaning, it will take longer to see the results)

## **SCRUB FREE CLEAN SHOWER® Daily Soap Scum and Mildew Stain Preventer**

### **Description**

The standard of purity. Just spray & walk away! Prevents soap scum & mildew stains. Daily use prevent soap scum & mildew stain buildup. No more scrubbing. No harsh chemical fumes. Fresh clean scent. Works great on all shower surfaces (Safe to use on most shower surfaces, does not contain bleach. Do not use on damaged surfaces, refinished tubs, natural stone or natural marble. For other surfaces, test in an inconspicuous area.). Does not leave a dull residue when used as directed. Made in USA.

### **Directions**

For best results, start using Arm & Hammer Clean Shower after your shower has been thoroughly cleaned and you'll never hate to scrub away soap scum and mildew stains again. Clean Shower actually prevents their buildup. Just spray Clean Shower on tiles, tubs, curtains, shower doors and all wet surfaces after every shower. It will prevent soap scum and mildew stain buildup. No need to scrub, wipe or rinse.
